Figure of the Times in a Rurai Point of View (Fro a the Harford Itmes, July 21.]

The lack I am in New York have reached the highest amount ever known, being only a million and a half short of one hundred millions of dollars. The Baston banks are equally expanded, having increased their loans during the past week more than a quarter of a million, while their specie has been reduced to the same extent. This extraordinary expansion has taken place at a time when regular exmencial engagements and business paper are estimated to have been reduced nearly one half below their usual amount at this season of the year.

below their usual amount at this season of the year.

The recessey inference is, that the great increase of leans has been made upon temporary hypothecation to tack, and that they have contributed largely to stimulate stock speculations. There are three circumstances which must, whenever they occur, cause a sudden contraction of the New York bank loans, and produce the usual results which follow upon this operation. It is expected that the imports will largely increase very soon. This facts upon the banks in a twofold manner—it causes a drain of a test abroad to pay the foreign cruditor, and a drain of species should be pay the foreign cruditor, and a drain of species abroad to pay the foreign cruditor, and a drain of species abroad to pay the foreign cruditor, and a drain of species abroad to pay the foreign cruditor, and a drain of species abroad to pay the foreign cruditor, and a drain of species abroad to pay the foreign cruditor, and a drain of species abroad to pay the foreign cruditor, and a drain of species abroad to pay the foreign cruditor, and a drain of species abroad to pay the foreign cruditor, and a drain of species abroad to pay the foreign cruditor, and a drain of species abroad to pay the foreign cruditor.

Men the entimous crops of the present season are ready for market. New York city will become largely indebted to the agricultural districts for the flour, wheat and corn forwarded for sale; and the gold which has of late been feely drawn from the country towas and cities, must with equal freedom be returned to actile the balance of trade, which then will be turned against the sash and. Commercial transactions so long restricted by groundless alarms of various kinds, will once more resume their accustomed activity. The effect of that upon bank leass will like wise be twofold. The large deposits, which, now it regulates the same of large decounts, will be withcrawn in order to be employed in regular business.

the discount of their business paper a large portion of the mose; new lossed on demand by the banks for the purposes of speculation in stocks. The country has as will also call home their present balances in New York, in order to make their contemps advances to the millers and owners of produce.

iances in New York, in order to make their castemary advances to the millers and owners of produce.

We cannot, therefore, sgree with one of the principal financial writers for the New York press, that it would be perfectly safe for the banks of that city still further to expand their present line of discounts, merely because they happen to have on hand four or five milious more of specie than they had at the corresponding period of last year.

Even at its present amount, \$16,000,000, the specie basis is about dy and danserously small with reference to the ecormous magnitude of the transactions built; upon a varrow a foundative. According to the latest returns, the loans of the Bank of England upon public and private securities amounted to only \$120,000,000, while the specie in their vaulus exceeded \$90,000 000. If this ratio of specie to loans is deemed recessary by the Bank of England for its security, how can it be considered asfe for the New York banks to lend \$100,000,000.

A very slight turn in the rate of exchange, or in the current of imparts, would drain them of half of their pittance of gold in a few weeks. It is, moreover, to be bonce in mind that the real capital of the banks, which proves to lend a hundred milions, is only about fifty milions, and consequently one half of their loars merely represents a fictitious value or arbitrary expansion of the currency which has no substantial ex stence, and is exposed at all times to be suddenly withdrawn or materially reduced, to the grievous injury of those who are dependent upon loans.

Regalta on the Connecticut River.

[Irom the Boston Advertiser, July 23]

Our readers are already aware that a conflience for a race having been thrown down by the boat clubs of Yale College to those of Harvard College, arrangements were made for a race upon Connecticut river on Saturday last.

The boats of the two colleges were measured against each other three years since upon Lake Winnipissingce, on which oc assim the Cambridge boat (the Onrida) beat all her competitors from Yale College, braning off the prize. The apprehension was very generally felt at Cambridge, however, that this resuit would be reversed in the new race, as it was believed that defeat had stimulated the Yale men to the purchase of finer boats and to renewed practice in rowing. The preliminaries of the race were setted but little more than a weak ago, and the examinations and literary exercises of the past week have allowed the Harvard men but little time for prepersory practice.

The Collience however, was accepted, and the

the examinations and literary exercises of the past week have allowed the Harvard men but little time for preparatory practice.

The challenge, however, was accepted, and the midnight train of Saturday brings up the intelligence that both the Harvard boats beat the Yale boats, the time of the best being about 22 minutes for the distance of these miles.

The prize (an elegant set of colors, presented by the citizeus of Springfield) was won for Cambridge by the Iris, of Harvard College, built at Chelsea. She cafried sight oars and a curswain, Mr. Joseph M. Brown, of the class of 1853, who was conswain of the victori us Oncida on the occasion of the Winni pitaleges used with the Yale boats in 1853. The ewwise as follows:—Samuel B. Parkman, (stroke) of the late Schomore class; William H. Elliott, of the late Sophomore class; William Croninshield, of the late Sophomore class; Charling Clapp, of the late Samior class; Schaming Clapp, of the late Samior class; and Josiah N. Williard, of the late Sphomore class; and Josiah N. Williard, of the late Sphomore class; and Josiah N. Williard, of the late Sphomore class; and Josiah N. Williard, of the late Sphomore class; Lingdon Erving, of the graduating class; John Erving, of the class of 1853; Alexancer E. R. Agasiz, of the graduating class; and Samuel G Perkins, of the late junior class, all of course of Harvard College. This boat carries and ocurse of Harvard College. This boat carries and ocurse of Harvard College.

while both were three minutes shead of the Yalv boats.

This intelligence will be most gratifying to the sons of Harvard everywhere, and we congratuiate our Cambridge friends on their triumphant and almost unexpected success. The art of boating is a most manly exercise, and excellence in it is no mean laurel to be bound about the brows of those distinguished in the walks of betters. Its outlivation adds those graves of body which are sometimes lacked by those too excessively devoted to the study of books, and we are rejoiced that it is not neglected in our colleges.

Adjournment of the Court of Dlat ms.

On Saturday last, the following named gamelemen were sworn Astorneys of the Court:—Charlessi, McDonald, of Georgia; P. R. Fendall, David A. Hall, Willism J. Stone, Jun., and Charles H. Winder, of Washington; and John W. Bryce, of New York.

Respecting the question of one judge acting in vacation, the presiding Judge remarked:—The Court consists of three judges, and it is a well-astabliance principle of law that when a tribunal of three is established all must be present to act; but two may decide a question against one. Two cannot, however, constitute a quorum, and of course one cannot ast in vacation, unless expressly authorized by law so to do. Some further legislation is necessary. Unless specific power is conferred, all must be present to constitute the Court; one cannot in any case act alone.

Respecting overse entered on the trial docket, depending in whole or in part on documentary evidence, the evidence must be filed with the petition. If the documentary evidence is on file in the departments, it will not be required to be filed with the case.

In the case of G. A. Magruder (No. 61) an amend-

case. In the case of G. A. Magruder (No. 61) an amendment was showed.

When important facts are added in an amendment it, must, by the rules of the Court, be sworn to. In the cases submitted the decision of the Court will not be announced in vacation.

The Court adjourned to the 17th of Ostober next.

DRATH AT YELLOW FEVER IN PITTERURG—INTER PERSISTER OF THE BOARD OF HEALTH.—A man named Dogan, restiling on Poplar alley, in the Sixth ward, lately returned from down the river, died yesterday at his resider ce, of yellow fever. Information was given to the Board of Health, and Mr. Fortune despatched an order to have the body immediately boured. This the friends of the deceased refused to do; but the police being sent to the house, carriages and a hearse were sent for. The friends again determined he should not be buried until this morning, and dismissed the vehicles; whereupon Mr. Fortune despatched the whole police, with a furniture car, with orders to forcibly take the body to a burial ground, and arrest any who resisted. Fortunately so disturbance ensued, and the body was left in the Catholic cometery at Lawrenceville. Three or four other cases in the same locality are reported. One of them is a brother of Timot y Murray, the young man who died at Louisville a week ago, of yellow fever.—Pittsburg Journal, July 21.

United States Commissioner's Court.

United States Commissioner's Court.

Before George F. Betts.

July 22.—The case of the nine seamen charged with revoit on board the American whip Hannibal, was again brought before the Commissioner, and the accused were committed for trial.

Another Charge of Recoit.—Joseph McDonald was held to answer a compisint of refusing to do duty on board the ship Arrich.

The Street Cleaning Machines, OFFICE COMMISSIONER OF STREETS AND LAMPS, NEW YORK, July 23, 1855.

TO THE EDITOR OF THE HERALD. Enclosed you will find my answer to the communication from his Honor the Mayor, addresed to me for relation to the estimates of Mesars. Smith, Scokel & Co., for cleaning a portion of the streets of our city, which is published in your paper of tais date. By publishing my reply in your paper of to morrow meeting, you will confer a favor on your obedient servant.

Commissioner of Streets and Lamps.

Department of Streets and Lamps.

Commissioner of Streets and Lamps.

DEPARTMENT OF STREETS AND LAMPS.

NEW YORE, July 23, 1855.

HON. FERNANDO WOOD, MAYOR:—

Yours of the 20th inst. is received, and in reply I would reajectfully state the following reasons for the delay in consummating the contracts for cleaning the streets with the lowest bidders:—

The Board of Aldermen and Councilmen, sometime since, passed a resolution requiring the Heads of Department to send all contracts to the Common Council for confirmation previous to concluding the seme.

And the section 494 of the ordinance directing that to contract for the payment of which an appropriation has not previously been made, shall be sigted or executed until such contract and all estimates relating thereto, shall have been laid before the Common Council, and an appropriation made therefor.

The appropriation called for by my predecessor was for cleaning the streets for the year 1855, based on the contracts then in existence. In consequence of the neglect of the contractors, a portion of the contracts were declared void by ne, and I then, with four concurrence, proceeded to clean the sizests until the balance of the contracts would expire.

The vart smount of flith, ashes, garbage, &c., that

contracts were declared void by ne, and I then with your concurrence, proceeded to clean the streets until the balance of the contracts weald expire.

The vast smount of filth, ashes, garbage, &c., that was left by the contractors in the streets, required an additional force of men and webleles to remove the same, and of course added greatly to the expense, in consequence of which the appropriation was reduced to a low figure, not leaving more than enough to carry the department through to the first of August.

I, in accordance, therefore, with what I believe to be the true meaning and intent of the ordinance 494, submitted to the Board of Councilmen all the estimates and the names of the lowest bidders, tygether with the amount of each estimate, for confirmation, and also submitted a statement of the expenses for the last six months, asking for an appropriation at the same time.

As a public officer I feel anxious to promote the public good as far as lies in my power, and at the same time.

As a public officer I feel anxious to promote the public good as far as lies in my power, and at the same time to comply strictly with what I believe to be my duty.

My advertisement calls for proposals for cleaning the streets for one year from the date of the execution of the contract. Censequently, therefore, there should, according to the ordinance, be an appropriation in made for over the expenditure called for in the estimates, it would be involving the department in difficulties of a serious nature to give out contracts and have no money to pay them with.

These are my reasons for pursuing the course! have taken. I may be mistaken in my opinion, but am willing to be corrected if wrong. My intentions are to do right in this and all other matters appertaining to the department over which I preside. I can see no reasons, nor have any been offered to me, to induce me to alter the course I have taken in this matter. It is now in the hands of the Common Council, and I am ready to full their instructions immediately on the

proceed without an appropriation from the Common Council.

In regard to the communication of Smith, Sackel & Co. to you, and which I have seen in the moraing papers of to-day for the first time, I would respectfully state that they have not represented the facts of the case in a true and just light to you; for what purpose they have done so, I am at a loss to kicw.

At the opening of the estimates on the 12th in stant, a large number of them were declared informal by the Comptroller; among these were the bids of Smith, Seckel & Co., all of which lacked the very important requisite called for by the ordinance, No. 498, namely: "It (the estimate) shall be verified by the oath in writing of the party making the estimate, that the several matters stated therein are in all respects time." The emission of the affidavit, I think, was fatal to

The emission of the still davit, I think, was fatal to their estimates, and rendered them informal; but I finally, by the advice of the Corporation Counsel and the Comptroller, allowed them to make the affi davit within twenty four hours, under the rule that errors of form may be so altered.

Whether this omission of an affidavit was an error of term or of substance I leave to others to decide. To show that I acted fairly in the matter, I not only allowed them twenty four hours, but extended the time forty eight hours longer, in order to accommo date them.

They state that I notified them to produce their

time forty eight hours longer, in order to accommodate them.

They state that I notified them to produce their securities with a view of closing said contracts. This is false. I never did notify them for any such purpose; and they well knew and understood at the time that the preons who were willing to go their security, provided the contract was awarded to them, were only required to make affidavit that they were worth the amount that they were willing to be bound for. This I at the time repeatedly told thrm, and they so understood it. I also informed them, are they as understood it. I also informed them repeatedly that they were only correcting the mistakes they had made in their estimates.

Immediately after they had so altered their catimates and made them in form, they, much to my aurprise, demanded of me the instant execution of the contracts with them. This hasty and unsalled

immediately alter they had so altered their estimates and made them in form, they, much to my aurprise, demanded of me the instant execution of the contracts with them. This hasty and unsailed for action en their part I treated with the contempt it deserved, and informed them I should notify them when the contracts were ready, if they were confirmed by the Common Council. They then demarked blank copies of the contracts and bonds, for the purpose, I suppose, of making the contracts themselves.

As I consider myself perfectly able to conduct the business of this department, I, of course, declined to furnish the same.

In their card to you and the public, they state that their proposals are in due form of law. They do not state that they were so when presented, leaving the public to believe that they required no time for alteration, and that they were, when presented, correct.

They also state that they were filed in due time, when the facts are that they were not filed in due form until the third day after they were effered; and I have my doubts whether they are even now legally filed.

There are other parties whose estimates are the lowest for eight of the wards. No complaints have been made by them of the action that has been taken by me in regard to all the estimates received, it seems singular that so much interest should be manifeated entirely for this company, and that the others, who are equally entitled to their claims, alould be overlocked. For my part, I shall endeavor to deal equal and exact justice to all parties.

All complaints that may be made to you in regard to the streets will be attended to instantly by sending to this office. Many of the complaints are made without cause, by parties interested in bringing this department into disrepute.

Hoping that my views may meet with your approval, I remain yours, respectfully.

Commissioner of Streets and Lamps.

## FINANCIAL AND COMMERCIAL MORRY MARKET.

MONDAY, July 23-6 P. M.

There was a very dult market this morning. Prices were unsettled and closed heavy. At the first board Ere bonds of 1875 fell of 1 per cent; Illinois Central bonds, 4; New York Central 7's, 4; New York Central Railroad, 4; Erie Railroad, i Nicaragus Transit advanced i per cent; Cumberland Coal i; Hudson Railroad, i; Chi-cago and Rock Island Railroad, 1; Indians 5's were cent; Cumberland Coal 4; Hudson Railroad, 4; Chicago and Rock Island Railroad, 14; Indians 5's were unusually active but slightly improved in market value. Cumberland Coal was the most active stock on the list. The sales sum up more than two thousand shares, principally on time. Reading Railroad has been very quiet since the declaration of a dividered off, and is firm at our quotations. The gross earnings for July, this year, will not compare very lavorably with those for the corresponding month last year. The tolls are now twenty-five cents per ion lower than in July last, and the tomnage thus far this month is less. The total gross income for July will be less, but the not income may be larger than in the same month last year. Eris Railroad has no life or activity. It does not vary much in market value, and we see no probability of its improving much. It is selling now at prices which are considered above par. That the payments into the sinking fund absorb its entire ret earnings, there can be no doubt; and as for dividends upon the stock, they are utterly out of the question. Fifty per cent for an amproductive stock is something very extraordinary over in these inflated times. The outrent prices.

paid for Harlem, Hudson River, Cumberland and Nicaragua are the rates for unproductive stock in this market. Erie is selling far above any of those

than any one of them.

At the second board the market was weaker and prices lower. Cumberland Coal declined & per cent; Erie Railroad, †; Reading Railroad, †. Illinois Can-tral Bonds advanced † per cent. The business this afterneon was to a small amount, and no one seems disposed to operate much. There are no buyers to disposed to operate much. There are no buyers to take contracts. There are plenty of sellers, but they must have buyers. Holders cannot realize without submitting to lower prices, and the indications are decidedly gloomy. It is utterly impossible to get up any speculative excitement. Prices are now far beyond speculative points, and must come down before now purchasers will touch stock in any way.

The Gardiner Gold Company have received the

most favorable advices from their mines—in three days working with the new amalgamators 330 dwts. of gold were obtained, valued at 90 to 95 cents per owt. Gold mining companies must seek out the most perfect amsignmators. There is no difficulty about the crushing machines. The ore can be crushed and ground fine enough; but nothing has as yet been invented in the way of an amalgamater that will extract all the gold. The ore in all our sold mines is rich enough; but the science is wanting to extract the mineral. The attention of our inventive geniuses should be turned to this fact, and see if something cannot be produced to remove the dif-ficulty. The Gardiner Gold Company are working a new kind of amalgamater, and the result thus far

has been very satis'actory.

The transactions at the Assistant Treasurer's office

Washington and Norfolk.

The warrants entered at the Treasury Department

at Washington, on the soth inst., were as follows:at Washington, on inequisi inst., were as follows:

For the Treasury Department. \$17,452 19

For the Interior Department. 60,465 98

For the Customs. 13,223 02

Covered in from miscellaneous sources. 33,015 79

Covered in from Customs. 62,578 79

Exchanges for week ending July 16. \$107,364,436

Bo. c. do. July 23. \$6,440,756

Bolance for week ending July 16. 6,029,930

Do. co. do. July 23. 6,021,385

The last returns, compared with those of the previous week, show a

Decrease in deposits of \$3.507.045

Decrease in specie of 644,757

Decrease in circulation of 168,638

Increase in loans and discounts of 613,715

This is by no means a satisfactory statement, but on the contrary a more unfavorable exhibit has

not been made for many months. A decrease in every department but discusses shows increasing weakness. The falling off in deposits and specie is a matter of the most vital importance. The deposits are now no larger than when the discounts were nearly five millions of dollars smaller. It is necessary that these two departments move along pretty uniformly together, and an expension is unsafe unless based upon a corresponding increase in deposits. The deposits in our banks belonging to banking institutions of the interior will be largely reduced by the withdrawal of funds to aid in moving the new crops, and the banks of this city will have to prepare themselves for this demand. The experiations of specie from this port this week will figure up nearly two millions of dollars, which

California. There is a equall brewing. The Connecticut River Railroad Company have declared a semi-annual dividerd of four per cent on its peferred stock, and two and a half per cent on its common stock. The Opean Steam Navigation Company (Bremen line) have declared a semi-annual dividend of five per cent. The Massachusetts Cotton Mills, three per cent.

The following advertisement appears in the St.

Cotton Mills, three per cent.

The following advertisement appears in the St. Louis papers:—

Whereas, the Ohio and Mississippi Railroad Company die, by deed of date the fifth day of June, A. D. 1855, and duly recored in the Recorders' offices of the counties of St. Cigir, Cinton, Marion, Cisy, Richland and Lawrence, in the State of Illinois, convey to the underegreed the following described property, to wit:—All the real estate, and right, title and interest, estate, claim and demand of, in and to any real estate in the said State of Illinois, which had at that date been acquired, or might thereafter be acquired by said Company, for and toward the construction of the railroad which said company were authorized to construct in said State of Illinois, as also for and toward the construction of engine houses, car houses, depois and other finaments, or for any other purpose connected with said railroad; and did also further convey, by said deed as aforesaid, all tenements, road tracks, rails, bridges and other fixtures whalsoever which might be placed or constructed by said company; and did also further convey by Wiff Gees aforesaid, all engines, locomotives tenders, cars, machinery, and all other property of whatoever kind, which then was or might thereafter be owned by said company; and all the tolls, income, revenue, issues san profits of the property thereby conveyed; and did further convey, by said teed as aforesaid, all privileges, franchises, casements, rights and interests whataever, at that date possessed, used or enjoyed, or which might thereafter be acquired or possessed by said company; which conveynes to the undersigned was in trust to secure the payment of a promisory note of sven date with said deed, executed by asid company that do not enjoyed, or which might thereafter be acquired or possessed by said company; which conveynes to the undersigned was in trust to secure the payment of a promisory note of sven date with said deed, executed by and company to Page & Bacon for the sum of one million cue

Mr. Bacen has addressed the following letter to the Mayor of St. Louis, on the subject of the report of the committee of the Board of Aldermen to which we alluded on Saturday:

Sr. Louis, July 14, 1856.

Mr. Drak Sin.—A committee of the Board of Aldermen of St. Louis, consisting of Norman J. Colman, Henry B. Belt and Ernatus Wells, under date of 13th instant has addressed me a letter in regard to the affairs of the Ohio and Missistippi Eailroad Company and my house.

That letter not only embrace a scope of inquiry beyond my power to reply in the time limited in my letter of the 7th instant, to E. C. Rischbura, Esq., and others, to the city to decide whether it will make any effort to save the road to the stockholders or not; but is couched in a language and written in a tone which can only be regarded as implying some indefinite, improper conduct on the part of my house. Such a letter was a sulting to myself; but respect for the city required that some notice should be taken of a communication from members of its council, and I replied to the committee.

But to me the interests of the city and county of St. Iouis and of the private stockholders of the road are flam my own feelings and duty perhaps requires that I should waive further notice of all that may be unpleasant in the extraordinary treatment thave received. In order, therefore, that the efforts and sacrifices of my house to secure to St. Louis and its citizens their abars in the ownership of this important road, I must again call your attention, as chief magistrate of the city, to the necessity of some immediate action, that we may jet, if possible, arrive at a satisfactory arrangement.

The people of the city will no count expect their representatives to act for the best interests of the stockholders, in which I shall rejoice to co-operate.

It is known to you that the standing committee of the Council or aritimade have had every facility afforded them for examining into the affairs of the company; that the books, vouchers and papers have been thrown

With sentiments of high esteem, I remain yours, truly, H. D. BACON.
Hen. Washington King, Major of St. Louis.
